SUMMARY

Software Engineer with 1+ years of experience building responsive, production-grade web applications using **Vue.js, MongoDB, Express, ReactJS and NodeJS** technologies. Skilled in REST API integration, authentication, frontend optimization, responsive design, state management, and agile software development. Experienced collaborating across cross-functional teams to deliver high-performance user-focused applications.

EXPERIENCE

Associate Software Engineer | V2Solutions

Apr 2025 – Aug 2026 | Vadodara, Gujarat

Client: CrossCountry Mortgage LLC (Vue.js, TypeScript, MongoDB)

- Improved frontend performance by ~**20%** by refactoring Vue.js components and optimizing state management.
- Built and shipped production-grade UI features for a high-traffic US mortgage platform.
- Collaborated across backend, QA, and stakeholders to deliver features in agile sprint cycles.
- Reduced UI defects by ~**30%** by integrating QA validation early in the development lifecycle.

Internal Project: Reflux (React.js, FastAPI)

- Implemented auth and repository fetching using PAT and API tokens for various version control systems and source code management platforms.
- Automated SCM error scans to fetch high-priority issues, create tickets, and manage PRs.

Web Developer Intern | Drop Techno Lab

May 2024 – July 2024 | Ahmedabad, Gujarat

- Built responsive UI components across **7+ modules** using HTML, CSS, Bootstrap, and JavaScript.
- Translated Figma designs into production-ready interfaces with focus on performance and usability.
- Integrated third-party libraries to enhance interactivity and user experience.

PROJECTS

Personal Portfolio Website [\[Live Demo\]](#) [\[GitHub\]](#)

React.js, Tailwind, Framer Motion, EmailJS

- Engineered a high-performance portfolio achieving ~**88% Lighthouse score** with 35% faster load times (LCP: 3.5s → 2.2s), a 38% smaller bundle size (~450KB → 280KB), and semantic HTML for a **95+ SEO score**.
- Implemented code splitting, component lazy loading, and image optimization following modern React best practices.

Uber Clone [\[GitHub\]](#)

MongoDB, Express, ReactJS, NodeJS

- Developed a ride-booking system with user/driver workflows and real-time tracking. Implemented JWT authentication and REST APIs for a secure and scalable backend. Built features including ride matching, driver actions, and payment flow simulation.

CA Portfolio Website [\[Live Demo\]](#) [\[GitHub\]](#)

MongoDB, Express, ReactJS, NodeJS, EmailJS

- Developed and deployed a responsive CA portfolio website having ~**99% Lighthouse score** showcasing professional services, profile details, and client contact options.
- Integrated EmailJS-powered contact functionality with reusable MERN components for a clean, user-friendly experience.

EDUCATION

Pandit Deendayal Energy University, Gujarat

2021–2025

- Bachelor of Technology in Computer Science and Engineering

CGPA: 8.62

SKILLS

- Languages:** JavaScript, Typescript, Python, Java, C++
- Frontend:** React.js, Vue.js, HTML, CSS, Tailwind, Bootstrap
- Backend:** Node.js, Express.js, FastAPI, C#
- Databases:** MongoDB, MySQL
- Core:** Data Structures & Algorithms, OOP, REST APIs, Authentication, State Management
- Cloud & Tools:** GCP, Git, GitHub Actions, CI/CD, Unit Testing (Vitest)
- Additional:** Agile Development, Team collaboration, Stakeholder communication

ACHIEVEMENTS AND PARTICIPATIONS

- Top 5 out of 125 teams – Ingenious 6.0 Hackathon (2025)
- Team Lead – Smart India Hackathon 2024
- Recognized as Top Web Development Voice on LinkedIn twice
- 1st Runner-Up – YMCA Chess Championship (2023)

CERTIFICATIONS

- Google Cloud Study Jams – 2023
- Flipkart Grid 6.0 – Software Development Track – 2024
